

User friendly packaging for installation cables

## DESCRIPTION

Cable Guy is a packaging alternative to bobbins, rings etc, which offers the installer easy and fast transportation and handling during installation.

During installation, Cable Guy is placed on the floor and the cable smoothly rolled out while Cable Guy stands steady on the floor. The box-shape makes storing compact and convenient, on shelves well as in your car. Cable Guy's handles makes carrying easy.

Cables delivered in Cable Guy are meter-marked which makes it easy to see how much cable is left in the box.

When all the cable is used, Cable Guy is easy to recycle as ordinary carton waste.
